

Corrib Gas Onshore Pipeline

PUBLIC INFORMATION NOTICE

Shell E&P Ireland Limited (SEPIIL) will continue with construction works relating to the onshore pipeline throughout the month of January. These works will again centre on the establishment of a works compound at lands owned by SEPIIL at Aughoo. Works this month will include the construction of internal roads, excavation, placement and export of peat, installation of drainage controls and associated works. There will be ongoing removal of peat from the site and importation of stone to the site.

The approved peak number of daily one-way traffic movements is 236, while the table below contains the estimated average daily one-way movements for the next two months. A map of the haulage routes is also displayed.

The majority of haulage traffic for this period will be to the construction compound at Aughoo, to Srahmore and the Bellanaboy Bridge Gas Terminal site, as well to local quarries.

Routes	Materials Being Hauled	Projected average number of one-way HCV movements per day	
		January	February
N59 to R313 to L1204 to R314 to L1202	Construction equipment and materials, welfare facilities, fencing, stone and some peat from the site at Aughoo to the peat deposition site at Srahmore.	204	208

If you have any comments or queries with regard to our operations, please contact our Corrib Project Information Office in Belmullet on **097 27100** or Corrib Freephone **1800 201 525**.

Dated this 9th day of January 2012.
